

MARK ANTONIO PIGOME

Full-Stack
Developer &
Automation
Specialist

Versatile Full-Stack Developer and autodidact coder with a non-linear path to tech—self-taught through tutorials and hobby projects that evolved into professional solutions. Grew up in the USA for 15 years, where I first learned coding as a hobby, before returning to Indonesia and applying hands-on experiences in logistics and facility operations to build practical digital tools. Specializing in engineering efficiency by automating workflows and creating robust infrastructure. Proudest achievement: developing and selling Reefer Guru (reefer-guru.vercel.app) to my current employer, PT. Panjasa Intradin (panjasa-intradin.com)—an AI diagnostic assistant that translates English Carrier Transicold handbooks into Indonesian for refrigerated container technicians. Fluent in English and Bahasa Indonesian; excel in multicultural environments with strong leadership and meticulous attention to detail.

EDUCATION

[2016 – 2018] —→ ARIZONA STATE UNIVERSITY
[2012 – 2016] —→ ST. MARY'S HIGH SCHOOL

WORK EXPERIENCE

PT. PANJASA INTRADIN – ADMIN (APRIL 2024 – PRESENT)

Manage cold chain logistics for 383 reefer containers supporting food distribution across Papua. Analyze LYNX Fleet data for issues, coordinate repairs, oversee inventory, and compile reports.

PT. PENGEMBANGAN JAYA PAPUA – IT & MARKETING (JUNE 2023 – APRIL 2024)

Administered and developed PJP's website (www.pjp.co.id), managing server and cPanel. Handled social media marketing, brand development, and content creation/authoring for website and blogs. Designed flyers/posters using Photoshop and served as event/holiday photographer.

ACU HEATING & COOLING | AIR CONDITIONING INSTALLATION (NOVEMBER 2021 – AUGUST 2022)

Installed HVAC systems at ACU Heating & Cooling, managing unit installations, intricate wiring, copper bending/soldering, and lifting heavy equipment (100+ lbs), while promoting eco-friendly practices through metal scrap recycling.

ARIZONA STATE UNIVERSITY – BIO DESIGN LAB | WAREHOUSE WORKER (SEPTEMBER 2019 – MAY 2021)

Managed facility logistics at ASU Bio Design Laboratory, operating autoclaves and -80°C/-20°C freezers, precisely transporting equipment, and coordinating placements for efficient operations.
